

## In autumn, things get colourful...

... and we take things even further with new and enhanced designs!

The **Square Dance** design delivers what the name promises. This square mixture of a wide range of materials has been created with a great deal of joy and courage – just like the American folk dance, which developed from traditional dances from a wide array of nations, which immigrated into the USA.

Several types of wood, stone, solid colours and even textiles together create this unique, special atmosphere. Whether in light pastel shades, as can be seen on the chest of drawers, or in a combination of rustic, warm woods with rough stone and textile, this design allows all your wishes to be fulfilled individually.

Since this decoration is produced using digital printing, small quantities and individual sizes of the layout are possible for an optimal fit.

Our new decor **Appenzeller Fichte** drives our standards further upwards. The precise, lifelike finish provides a wow effect for the eye. The lively play of colours is in harmony with the sophisticated and detailed texture of the wood. Refined with our familiar haptic, you can feel and experience nature up close again.

### Did you know...?

We have a new solid colour in our portfolio. Our  **dusky pink**, with its restrained colour nuance, perfectly suits a contemporary interior.
